

Notes for your safety

Personal protective equipment (PPE) must be worn in many areas of our site. For your own safety you must wear the appropriate safety equipment when entering these areas. If you do not have the required PPE please inform your Fronius contact person. Comply with mandatory and prohibition signs. If you have questions ask your contact person.

Electromagnetic fields are present in certain areas. The access to these areas is forbidden to persons with pacemakers or other implants.

Pay attention to internal traffic when walking on logistics routes and in the outdoor areas. Our forklift trucks are equipped with electric drives, so they may not be heard and generally have priority. Automated guided vehicles (AGVs) project a blue spot on the ground while driving to indicate the direction of travel and increase awareness. Do not loiter in transfer areas. Pay attention to audible and visual warning signals.

On the whole site you must comply with the Austrian Road Traffic Act (StVO) and with the mandatory speed limit.

Smoking is prohibited across all our sites, except in intended outdoor areas or atria.

Ask your contact person before leaving the visitor group.

Remain on marked footpaths/traffic routes.

Do not enter forbidden areas.

Action in case of emergency

Observe alarm signals and instructions of the fire protection team. An audible siren signal means that the fire alarm system has been activated and serves to alert the fire protection team. A continuous siren signal is an evacuation alarm, which means that you must leave the building immediately and go to one of the designated assembly points.

In case of accident or environmental damage, notify our internal on-call service on 0664 6213800. In case of imminent danger, call the emergency services by dialing 122 (Fire), 133 (Police), or 144 (Ambulance).

If there is a fire, alert the fire department by pressing the pushbutton alarms.

In case of danger, leave the building via the escape and rescue routes. Help injured persons. Do not use elevators and close doors behind you. Follow the instructions of Fronius personnel.

Then go to one of the signposted assembly points and await further instructions there. Report missing persons to the Fronius „Emergency Guides“ at the assembly point.

In case of injury, first aid kits and first responders are available during working hours.

All Fronius sites are equipped with defibrillators which can be used by non-medical personnel.

Some areas are equipped with a gas extinguishing system.

In the event of an alarm indicated by an audible and visual warning signal, leave the room immediately.

Be sure to observe the carbon monoxide warning devices located at the entrances/access points to the garages. When these warning indicators are triggered, leave the garage immediately by the shortest route.

Confirmation

of briefing

“Safety Instructions for visitors”

Name of briefing recipient:

Name of briefer/contact person:

By my signature I confirm that I have received the briefing and understood the content. Furthermore, I undertake to comply with and implement the requirements discussed in connection with the Fronius Safety Instructions. I also acknowledge receipt of the locking media indicated above.

Date: _____ Signature of
briefing recipient: _____

Process for the Fronius contact person

You are responsible for the safety of the contractor resp. service provider. Therefore please pay attention to the following steps:

1. Visitors have to be accompanied at all times. Offside of our administrative areas they must be instructed at least once a year regarding this brochure. If needed an actual version of the parking rules has to be handed over.
2. By using the form above, the visitor has to confirm the receipt and understanding of these safety notes. This section remains with the Fronius contact person and has to be kept for at least one year.
3. Before leaving the site the visitor has to check out.
4. Make sure that in case of evacuation, your guests also go directly to one of our meeting points.

Safety Instructions for visitors

Welcome to Fronius. This leaflet will help familiarize you with important safety rules and our code of conduct. Please be sure to follow these instructions. We wish you a pleasant and safe stay at our site.

Entering and Leaving the company site

- Please report to the reception or to your Fronius contact person after arriving on our site. The contact person will clarify this safety instruction. Please acknowledge the receipt in the first section of this brochure.
- Issued badges must be worn in a visible place.
- At the end of your stay please check out at reception or to your Fronius contact person. Return all badges, keys, etc..
- Badges and keys are not to be handed over to other persons. A loss has to be reported to your contact person at once.

Notes on company security

Filming and taking pictures is not allowed without permission.

Use of mobile phones in designated areas is prohibited.

Electronical devices must not be connected to our company LAN without authorization.

Outdoor areas and sensitive indoor areas are monitored by CCTV

Data privacy statement

Fronius processes your personal data (name, company name, service provider, e-mail address, telephone number, time, duration and scope of access authorization, time of handover of the authorization card, door openings) for the purpose of allocating and managing access authorization and traceability (e.g., in the event of evacuation or investigation) on the basis of overriding legitimate interests (Art 6 (1) (f) GDPR) in the protection of property, the health and safety of all persons granted access, and for the performance of a contract (Art 6 (1) (b) GDPR). For more information about data protection at Fronius and your rights, please visit our website at <https://www.fronius.com/en/data-privacy-statement>
